

## Tmux command cheat sheet

This is a command cheat sheet that I use when I use tmux in a command-line or terminal environment, nowadays Tmux comes as default on some Linux systems.

[Tmux online info](#)

[Tmux original cheat sheet](#)

ctrl+b & shift+% = split screen (|)

ctrl+b+left or right arrow = switch other screen

ctrl+b & shift+" = split screen (--)

ctrl+b+up or down arrow = switch to other screen

ctrl+b&d = detach from that screen

ctrl+b ctrl+ → = resize current pane you are in

ctrl+b ctrl+ ← = resize current pane

Typing exit = close/leave a screen & tmux and exit out of of tmux

tmux ls = no server running on /tmp/tmux-1000/default

Feel free to download, modify, and use this cheat-sheet however you wish.
